

# CRON

```
01 04,05 01 * 1,3 #!/bin/bash mv
/media/sf_sandbox/todaysDocuments/
/media/sf_sandbox/backupDocuments
```

I set up a cron to move my todaysDocuments into my backupDocuments between 4:01 and 5:01 on every day of every month as long as it is Monday and Wednesday. At least that is what I hope I did.
